- As an admin, I want to set user permissions, defining what actions they can perform within the workspace.
- As an admin, I want to create new workspaces, naming and configuring them as needed.
- As an admin, I want to save and load workspaces to facilitate collaboration sessions.
- As an admin, I want to resize the workspace dynamically to accommodate the requirements of the collaboration.
- As a user, I want to be able to add and move images around the workspace and change their layering order.
- As a user with the right permissions, I want to add text areas to the workspace, allowing text input and editing. (Ability to read and write/ draw)
- As a user, I want to access the collaborative space from common web browsers (e.g., Chrome, Firefox, Safari).
- As a user, I want to use the system on different platforms, including Windows, Mac, Linux, Android, and iOS.
- As users, we want to play a card game (e.g., whist) with a shared deck, hands, and a table for playing cards.
- As users, we want to draw cards from the deck, see our hands, and interact with the shared game table.
